AFFORDABLE LIFTS

Simple, Safe, & Reliable.

Stay in the home *you love.*

When stairs, porches, and entryways become harder to manage, a remodel or a long ramp isn't your only option. Our lifts start around $150 a month — built factory-direct in Lynchburg, Virginia.

WHERE WE CAME FROM

"Jeanne didn't need something complicated. She needed something simple, safe, and affordable. It didn't exist — so we built it."

Affordable Lifts began with a deeply personal challenge. Jeanne wanted to stay in the home she loved, but as cancer treatments weakened her body, even leaving the house for church or medical appointments became difficult and unsafe.

Her family went looking for a solution — and found that most accessibility equipment cost **tens of thousands of dollars**. Even a simple ramp would have cost thousands and taken more space than her home allowed. So two brothers built the answer themselves, working out of a backyard workshop in **Lynchburg, Virginia** — focused on durability, safety, and straightforward function.

Neighbors started asking about the lift. Then nearby communities. Then families across the country facing the same problem Jeanne had. The backyard workshop grew into a manufacturing operation, and Affordable Lifts became a full-time company with one mission: **helping people stay in the homes they love**.

2018	The first lift is built in a backyard workshop for one family.
Today	Nearly 10,000 households helped across the U.S. and internationally.
2026	Expansion into a nearly 20,000 sq ft facility.

BUILT TO FIT REAL HOMES

THREE WAYS WE CAN HELP

One lift platform, three kinds of jobs

Every Affordable Lift shares the same simple, safe, reliable design — configured for who, or what, is riding.

01 · HOME

Residential Access

Indoor or outdoor access for porches, garages, decks, and interior level changes — designed around aging in place.

Pages 4–5 →

02 · COMMUNITY

Commercial & Community Access

The Community Access Series for churches, studios, nonprofits, nursing, and rehabilitation facilities.

Page 6 →

03 · MATERIALS

Cargo-Only Lifts

A straightforward platform for moving supplies, inventory, and equipment — never people.

Page 7 →

> *Not sure which fits? Call us at 757-524-3420 — we'll talk through your space and point you to the right configuration, no pressure.*

01 · RESIDENTIAL ACCESS

Simple access, built to fit your home

Think of it as a compact home elevator — built for residential use, indoors or out, and sold factory direct with no dealer markup. Designed around aging in place: porches, garages, decks, and interior level changes.

FROM
$4,749
LIFT HEIGHTS UP TO 4 FEET

FROM
$7,698
LIFT HEIGHTS UP TO 20 FEET

> *Most configurations land between $4,800 and $10,000 depending on height, customization, and finish. Custom platform sizes, finishes, higher capacities, and special bracing can add to the final price.*

WIRELESS CONTROLS STANDARD

FULL-HEIGHT RAILS · PORCH INSTALL

Specifications

Lift heights	3 inches to 20 feet — and every inch in between
Platform sizes	Customizable from 20" × 20" up to 44" × 70"
Standard platform	36" × 48" (34" × 48" usable interior)
Rail height	32" standard, customizable up to 48"
Weight capacity	750 lb standard
Environment	Safe indoor and outdoor operation
Power	Standard 110V outlet, 20-amp breaker
Gates	Straight-through or turning entry
Controls	Wireless standard · tethered optional
Sound level	64 dB — soundproofing included on every lift

> *Every home is different. Platform size, gate layout, height, and finish can all be configured — if you need something specific, chances are we've built it before.*

DECK INSTALLATION

WHITE FINISH · PATIO

02 · COMMUNITY ACCESS SERIES

Practical access for organizations that serve people

Churches, dance studios, community nonprofits, nursing facilities, and rehabilitation providers often need to solve one short level change without turning the project into a major renovation. The Community Access Series is designed for that practical need, with taller configurations available when the site requires one.

Short community lift — up to 43" station height

from $4,274

Best for stages, platforms, interior transitions, porches, and other lower rises.

Taller community access — 44" to 20'

from $5,173

Need to reach a higher landing? Base-bracket configurations are available from 44 inches through 20 feet. Product only; shipping and add-ons separate.

750 lb

PASSENGER-RATED CAPACITY — THE STANDARD FOR EVERY LIFT THAT CARRIES A PERSON

Under 1 hr

MANY SHORT-LIFT INSTALLS ON A PREPARED SITE

FAST, PREPARED INSTALLATION

Ships fully assembled through 34 inches of station height and partially assembled from 35 to 43 inches. With a prepared site, many short-lift installations can be completed in under an hour.

> **Site requirement:** *The property must already have an accessible solution in place for entry into the building. Local permitting, site preparation, and code requirements should be confirmed for the project location.*

03 · CARGO-ONLY PLATFORM LIFTS

Move materials, inventory, and equipment — not people

Our cargo-only configuration removes the residential extras many material-handling applications do not need. It is typically supplied as an open platform, with optional rails or gates when the site calls for them.

Short cargo platform

from $4,037

For lower rises, work areas, storage transitions, and loading applications. Cargo only.

Tall cargo platform

from $6,543

For higher landings and multi-level material movement, configured to the structure. Cargo only.

1,000 lb weight limit

CHOOSE THE PLATFORM SIZE, CONTROLS, AND OPTIONAL RAILS OR GATES THAT FIT THE MATERIAL-HANDLING JOB

Never use a cargo-only lift to transport a person.

Cargo-only lifts reach 1,000 lb precisely because they never carry people. Every lift built for human transportation is rated at 750 lb. For moving people, choose our Residential or Community Access lifts.

Site requirement: *For installations serving a commercial building, the property must already have an accessible solution in place for entry into the building.*

FINANCING

Payments from $150 / month

Financing is offered through our partner, Hearth, with extended payment plans that spread the cost over multiple years. Veteran discounts available, plus potential veteran funding options for injuries connected to wartime service. Financing for qualified buyers; actual payments vary with credit approval, terms, and final specifications.

SHIPPING & PICKUP

Lifts ship throughout the United States, secured to a pallet. Rates by time zone:

Eastern Time Zone	$999
Central Time Zone	$1,249
Mountain Time Zone	$1,499
Pacific Time Zone	$1,749
Facility pickup — Lynchburg, VA	$299 weekday · $499 weekend

ALMOND · CUSTOM PAINT

The best way to price your lift is a quick quote from our team — call or text 757-367-8640. We'll help you choose the right configuration and quote the exact price, shipping included.

FROM QUOTE TO FIRST RIDE

Simpler than you'd expect

No remodel and no construction crew. Most lifts are riding up and down the same day they arrive.

1 **Get your quote**

Tell us about your entry, deck, or steps. We'll help you choose the height, platform size, and options that fit — then quote the exact price.

2 **We build it in Virginia**

Your lift is built factory-direct in Lynchburg and configured to your order — height, platform, gates, walls, and finish.

3 **It ships to your door**

Securely wrapped and bolted to a pallet, arriving pre-assembled or in two primary components: the lift column and platform assembly.

4 **Install and ride**

Position on a firm, level surface, plug into a standard outlet (GFI-protected outdoors), set the auto-stop height, and test. A detailed installation manual is included, and our support team is a phone call away.

93%

INSTALLED BY THE HOMEOWNER OR SOMEONE IN THEIR NETWORK

2–3 hrs

TYPICAL INSTALL FOR TWO ADULTS

SAME-DAY READY

> *Plan for a lift footprint of 51" right to left × 42" front to back (standard platform), with a cement pad of 53" right to left × 45" front to back. Allow room for gates to swing, on a smooth, level surface. Some jurisdictions may require a permit or licensed contractor — check with your local municipality.*

OPTIONS · PROTECTION & WEATHER RESISTANCE

Protect your lift for the long haul

Help protect your lift from moisture, outdoor exposure, corrosion, and everyday wear.

Column + Hardware Galvanizing — $400

A practical option when extra protection is most needed on the column and hardware.

Platform Only Galvanizing — $950

Extra protection for the platform surface to help reduce rust over time.

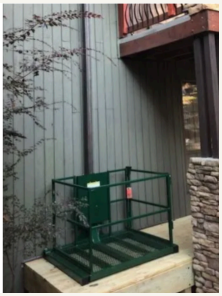

Canopy Frame — $999

Overhead coverage for outdoor applications, protecting the lift area from the elements. Frame only — plexiglass or similar covering is recommended after installation.

Full Lift Galvanizing — $1,350

Recommended for harsh outdoor environments, especially coastal areas or installations near saltwater.

> *Strongly recommended when rust prevention matters most — moisture exposure, coastal air, or full outdoor installs. Note: galvanizing is a bare-metal treatment and cannot be applied over a painted lift.*

OUTDOOR INSTALL

Some upgrades may be recommended based on your lift size, installation environment, and final configuration — we'll flag what makes sense for your site during the quote.

OPTIONS · PLATFORM & SURFACE

Upgrade the platform to fit your use

Solid Floor — 36" × 48" or smaller — $349

A clean, upgraded platform surface for standard-size lift configurations.

Solid Floor — larger than 36" × 48" — $499

For larger lift configurations requiring a solid floor surface.

Removable Rails — $300 / side

Selected rail sections become removable for added access and flexibility during loading or unloading. The safety panel cannot be removed.

OPTIONS · WALLS & ENCLOSURE

Enclosure, safety, and a finished look

Half-Height Mesh Walls — $249

Adds protection while maintaining visibility and airflow.

Full-Height Mesh Walls — $399

More enclosure while still keeping an open feel.

Full-Height Solid Walls — $499

A more enclosed option for added privacy and a more substantial appearance.

Full-Height Solid Walls, Galvanized — $599

The enclosed look of solid walls with added corrosion resistance for outdoor or high-moisture environments.

OPTIONS · CONVENIENCE & BACKUP

Manual Crank

$499

Operate the lift manually in the event of a power outage — added peace of mind, year round.

OPTIONS · APPEARANCE & FINISH

A color that fits your home

Custom Paint

$300

Upgrade beyond standard finish options — any of the twelve colors below, applied at the shop before installation.

Hunter Green	**Dark Brown**	**Leather Brown**	**Regal Red**
Aluminum	**Light Machine Gray**	**Smoke Gray**	**Royal Blue**
Sand	**Almond**	**Black** Flat · Gloss · Semi-Gloss	**White** Flat · Gloss · Semi-Gloss

> *Printed colors are approximate — ask us for physical samples before you decide. Painted lifts cannot be galvanized, so choose paint or galvanizing based on your environment.*

MOUNTING & BRACING

Two ways to mount

Armed Base — station heights up to 44"

A free-standing support option, ideal when attaching to a structure is not possible. Ships fully assembled up to 34" station (landing) height, and partially assembled up to 43".

Base Bracket — station heights 44" to 20'

Secures the lift directly to your house or deck. And when the lift can't sit right up against the structure, we simply bridge the gap — a triangle brace reaches from the house or deck over to the column to hold it steady. Multiple configurations are available to fit your setup.

> *A note on stability: it's the bracing at the top of the column — not the base — that truly steadies a lift. Think of a flagpole: you don't steady it from the bottom, you steady it from the top. That's why the base bracket's upper attachment is the most important piece of the installation.*

ARMED BASE

FREE-STANDING · UP TO 44"

BASE BRACKET

ATTACHED · 44" TO 20'

INSTALLED IN REAL HOMES

Configured for the space it serves

SECOND-STORY DECK · BASE BRACKET

HUNTER GREEN · SOLID WALLS

DECK INSTALLATION · STANDARD RAILS

> *Every one of these lifts was built to order in Lynchburg — sized, colored, and configured for the home it serves.*
